

BRAVERY CONSTRUCTION
A SDVOSB and MBE Company

CAPABILITY STATEMENT

"Our goal is to provide the client with immediate action to solve the current issues while also looking into the future life of the roof asset. A Roof Asset Management Plan is always advised. By having a comprehensive plan in place, financial decision-makers will have the evidence they need to allocate funds for the project. It also plans for long-term maintenance that will extend the life cycle of your roofing and waterproofing systems and protect the interior from water intrusion."

ABOUT US

Bravery Construction has over 70 years of combined experience in the construction industry. Our commitment to quality, safety, and adherence to project specifications ensures that we can meet and exceed your expectations as both **Roofing and Waterproofing Contractors**.

We possess the expertise needed to effectively handle a wide range of roofing systems, including but not limited to thermoplastic polyolefin (TPO), polyvinyl chloride (PVC), modified bitumen (APP or SBS), ethylene propylene diene terpolymer (EPDM), liquid applied membranes, and built-up roofing (BUR).

As a **Certified Native American (MBE)** and a **Certified Service-Disabled Veteran-Owned Small Business (SDVOSB)**, we remain fully committed to complying with the provisions of FAR 52.219-8, Utilization of Small Business Concerns.

Bravery Construction specializes in the Building Envelope. We specialize in an extensive array of roofing and waterproofing services, encompassing a comprehensive suite of solutions such as visual inspections, infrared inspections, leak repairs, complete roof removal and replacement, and new construction. Our expertise extends across all roofing and waterproofing systems, making us a versatile and trusted choice for your project needs. Our team is committed to delivering high-quality work on time and within budget.
